## INSTRUCTIONS

Practice the numbers from 0 to 100 with your students prior to game begins. The students should know what the numbers represent, what they sound like and how they are written down.

Play the audio. Make sure the students understand the instructions. Help them with the bigger numbers. Make sure they don't mix 13 with 30, 14 with 40, 15 with 50, and so on.

The winner may come up when a student completes a row, a column or a diagonal line. Additionally, there can be a second winner for the student who marks all the numbers on the scorecards.

Have fun!

B	I	N	G	O
11	33	4	22	6
7	84	27	16	95
